TEAMS is structured for Collaborative and Cooperative Content Development and Sharing by all Participating School Districts

Collaborative Development

- ☛ Each district benefits from the cooperative and collaborative development of instructional resources and test items amongst all participating districts
- ☛ Every resource and item is reviewed and approved by a panel before it is published for use by others
- ☛ Districts can easily integrate TEAMS with their existing data warehouse, portal or choose what is available through TEAMS

Empowers Administrators

- ☛ Enables high quality professional development to teachers
- ☛ Allows easy changes/additions to instructional material
- ☛ Be green and lean – save money and resources by providing all information electronically
- ☛ Encourage and energize your teachers to contribute to the repository and leave a legacy for years to come
- ☛ Motivates administrators to collaborate within and outside their district

Energizes Teachers

- ☛ Provides a platform for teachers to author instructional assets (resources and test items)
- ☛ Offers an easy and efficient process to align assets to Common Core and Other standards
- ☛ Gives teachers the ability to collaborate with their peers
- ☛ Affords teachers the opportunity to quickly and easily find resources to teach and publish for students
- ☛ Allows teachers to utilize instructional content anytime and anywhere

Encourages Parents & Students

- ☛ Affords Parents the opportunity to be more involved in their Student's education
- ☛ Allows parents to follow their student's progress
- ☛ Enables parents to help their student using specific content published by the teacher
- ☛ Students can review their performance and practice specific skills at home
